LONG TERM 2 MONITORING

LT2 samples must be collected from raw source water prior to chemical treatment and filter backwash return. Per rule, filtered systems serving fewer than 10,000 shall conduct E. coli sampling every two weeks for one year. Systems serving greater than 10,000 shall conduct Cryptosporidium, E. coli, and turbidity monitoring a minimum of one sample per month for two years on the day specified in your system's approved sampling plan. The Rule requires TNC systems to collect an E. coli (enumerated) sample every two weeks while operating.

Sampling Locations	Facility ID: ST001 TANKS

VERMONT

DRINKING WATER AND GROUNDWATER PROTECTION

MONITORING SCHEDULE

VT0021453 CAMP JOSEPH

Schedule Year: 2015

System Status: A

System Type: NC

Primary Source: GW

Population: 200

COLIFORM BACTERIA MONITORING

Sampling Locations	Facility		Sample	
	ID	Facility Name	Point ID	Description
	DS001	DISTRIBUTION SYSTEM	TC001	

Analyte/Group Name	Monitoring Period	Monitoring Frequency
COLIFORM BACTERIA	5/1 - 9/30	1 every Quarter

CHEMICAL MONITORING

Sampling Location	Facility ID: PF001		PUMP FACILITY	
	Sample Point ID: EP001		ENTRY POINT	

Analyte/Group Name	Monitoring Period	# Samples	Monitoring Frequency
NITRATE	1/1 - 12/31	1	Yearly

VERMONT

DRINKING WATER AND GROUNDWATER PROTECTION

MONITORING SCHEDULE

VT0021455 MACHS GENERAL STORE AND PIZZA

Schedule Year: 2015 System Status: A System Type: NC Primary Source: GW Population: 37
